ABOUT

Frontend Developer with 4+ years of commercial experience in building and maintaining websites and web applications. Progressed from intern to middle-level developer, contributing to the delivery of 500+ projects as part of a collaborative team. Experienced in developing landing pages and complex interfaces according to design layouts, participating in code reviews, improving development processes, and working closely with designers and stakeholders. Strong advocate of clean code, documentation, and continuous learning, with hands-on experience in MERN and JAMstack technologies and mentoring trainee developers. Currently seeking a Frontend Developer role to further grow as a specialist and gain new technical and product experience.

EDUCATION

**Kharkiv National University
of Radio Electronics**

Sep 2014 – Jun 2018

Bachelor

EXPERIENCE

Frontend Developer | May 2024 – Present

GoIT Türkiye (EdTech)

- Contributed to the delivery of 100+ client landing pages and quizzes
- Refactored and optimized the landing-page build starter, cutting build and deployment time by ~50% while improving code readability, stability, and scalability.
- Collaborated with designers to implement a design system, reusable components, and a design checklist, significantly accelerating development.
- Improved website accessibility by implementing WCAG standards, ensuring better usability for all users.

Frontend Developer | Nov 2021 – Apr 2024

SoftRyzen (Digital agency)

- Promoted from Intern to Middle Front-End Developer
- Contributed to delivery of 400+ client projects
- Improved development workflows
- Mentored 5 trainee developers
- Maintaining high code quality through reviews and documentation
- Deepening JAMstack expertise through an individual development plan.
