------------------ SUMMARY ------------------

I have 3 years of commercial experience in creating websites and web applications. I am currently seeking a Frontend Developer role where I can continue to develop my skills as a specialist and gain new experience. I am proficient in the following tech stack: HTML, CSS, SASS, TailwindCSS, JavaScript, TypeScript, React, Next.js, and Redux.

--------------- WORK EXPERIENCE ----------------

Frontend Developer
SoftRyzen | November 2021 - Present

Achievements:
In this company, I progressed from an intern to a junior developer and eventually became the team leader of the landing page development team consisting of 6 people, with whom we successfully completed more than 150+ projects.

Responsibilities:
- Development and maintenance of landing pages and sites according to layouts.
- Participation in meetings to plan, coordinate and improve processes in ongoing projects.
- Participation in Code Review with colleagues.
- Communication with designers to obtain feedback on the compliance of developed products.
- Implementation of an individual development plan (IDP) for the study Front-end technologies of the JAM stack.
- Mentored 5 new trainee front-end developers on team.
- Created informative documentation.

------------------ EDUCATION ------------------

Kharkiv National University of Radio Electronics
Bachelor | September 2014 - June 2018
