WORK EXPERIENCE

Frontend Developer
SoftRyzen | November 2021 - Present

Achievements:
At this company, I progressed from an intern to a middle developer, working in a team of 6 developers. Together, we successfully delivered over 400 projects, and continuously improving development processes

Responsibilities:
- Development and maintenance of landing pages and sites according to layouts.
- Participation in meetings to plan, coordinate and improve processes in ongoing projects.
- Participation in Code Review with colleagues.
- Communication with designers to obtain feedback on the compliance of developed products.
- Implementation of an individual development plan (IDP) for the study Front-end technologies of the JAM stack.
- Mentored 5 new trainee front-end developers on team.
- Created informative documentation.
